

**Note to accompany release of initial survey results to the public: Orchard Downs
Redevelopment Assessment (SRL #1022)**

This document contains tables of preliminary results of the survey conducted to assess public opinion on the redevelopment of Orchard Downs. The Survey Research Laboratory (SRL) of the University of Illinois assisted in the management of the data collection. Survey-related information was given to the public mainly during the two public open houses on the redevelopment of Orchard Downs held on May 2, 2007, and May 16, 2007. Meeting attendees were given the opportunity to either visit the designated Web site and complete the online questionnaire or complete a paper-and-pencil survey, copies of which were available during the meeting, and mail it to SRL in an enclosed postage-paid envelope. Information about the Web site where the online questionnaire was located also was provided via other media (e.g., via articles in *The News-Gazette* and on the official Orchard Downs Web site).

One hundred and fifty-one respondents completed either the online or the paper-and-pencil questionnaire. Their responses were compiled and tabulated and are presented in this document. Although overall 151 respondents completed the questionnaire, the number that responded to any single question might be less than this number depending on whether any of the respondents chose to not answer a particular question.
